Current position

2018 - Barcelona Institute of Economics (IEB, Universitat de Barcelona), Postdoctoral Research Fellow

Education

- 2017 PhD in Economics
University of Warwick
Advisors: Ben Lockwood, Mirko Draca
Thesis: "Rules, discretion and quality of government: evidence from Italian municipalities"
Committee: James Fenske, Andrea Tesei
- 2012 MSc in Economics (research)
London School of Economics and Political Science
- 2010 MSc in Economics
Catholic University of Milan, Italy
- 2007 B.Sc. in Economics and Management of Arts and Entertainment
Catholic University of Milan, Italy
- 2006 Erasmus Exchange program
University of Valladolid, Spain

Teaching Experience

2017-2018 Econometrics 2 - EC338, micro-econometrics, Lecturer
University of Warwick, Department of Economics

2017-2018 Econometrics - EC9760, Teaching Assistant
Warwick Business School

2017-2018 EC9A3 – Advanced Econometric Theory (PhD)
University of Warwick, Department of Economics

2015-2018 Econometrics 1 - EC226, Senior Tutor
University of Warwick, Department of Economics

2016-2017 Introduction to statistics and Stata, Teaching Assistant
Warwick Business School

2015-2017 Econometrics A - EC902/EC907 (MSc), Teaching Assistant
University of Warwick, Department of Economics

2014-2016 Econometrics, Teaching Assistant
Warwick Economics Summer School

2013-2015 Econometrics 1 - EC226, Teaching Assistant
University of Warwick, Department of Economics

Research Experience and Other Employment

2016-2017 Research Assistant, Fernanda Brollo and Mirko Draca
University of Warwick, Department of Economics

- 2015 Research Assistant, Fernanda Brolo and Juan Carlos Gozzi
University of Warwick, Department of Economics
- 2015 Research Assistant, Thiemo Fetzer

Awards and Extra Curricular Achievements

2017 Paper “Fiscal rules and the selection of politicians: evidence from Italian municipalities”
Winner of the EEA Young Economist Award, EEA-ESEM 2017, Lisbon
Awarded by Unicredit & Universities Foundation

2012 ESRC DTC scholarship for 3 years of full-time study.
Awarded by the Graduate School of the University of Warwick

2010 “Marco Fanno” scholarship for graduate studies in economics, academic year 2011-2012.
Awarded by Unicredit & Universities Foundation

2010 Toefl certificate (Internet based test, final mark 101)

2010 GRE (Graduate Record Examination): quantitative 780/800

2008 Working Experience Abroad, Catholic University of Melbourne (Australia)

2007 Dele certificate (Diploma de Español como lengua extranjera, intermediate level, 95/100)

Skills

Languages: Italian (native), English (fluent), Spanish (fluent)

Computer: Stata, Excel, Latex, Scientific Workplace, Word

Research papers – Abstracts

“Fiscal rules and the selection of politicians: evidence from Italian municipalities” *Winner of the EEA Young Economist Award at the 2017 Annual Meeting of the European Economic Association* SUBMITTED

Despite the wide adoption, there is little evidence on the consequences of fiscal rules for the quality of government. I use data from Italian municipalities to study how fiscal rules affect the selection of politicians. In 1999, the Italian government applied fiscal rules to all municipalities. In 2001, it removed them for municipalities with less than 5000 inhabitants. Using a Difference-in-Discontinuity design, which enables control for an institutionally mandated increase in the wage paid to politicians at the 5000 threshold, I show

that fiscal rules negatively affect the level of education of politicians. The result highlights a trade-off to fiscal rules. Reducing policymaking discretion may alleviate inter-jurisdictional externalities, but it may also lower the quality of the political class.

“Not welcome anymore: the effect of electoral incentives on the reception of refugees” SUBMITTED

Do electoral incentives affect immigration policies? I study this question in the setting of Italian municipalities making decisions about the reception of refugees. The localized control of the reception policy, combined with the exogenous timing of policy decisions and staggered elections, enables me to study the effect of electoral incentives on the reception of refugees. Although municipalities receive fiscal grants for hosting refugees, electoral incentives reduce the probability of opening a refugee centre by 24 per cent. The results suggest that electoral incentives may induce politicians to make decisions that are potentially detrimental from an economic perspective.

“Manager or professional politician? Local fiscal autonomy and the skills of elected officials” (with M. Bordignon and G. Turati) SUBMITTED

We provide a theoretical and empirical assessment of why local fiscal autonomy can affect the skills of elected officials in sub-national governments. We first develop a model of politics with different types of politicians and show that -- following a tax decentralization reform increasing local fiscal autonomy -- politicians with high administrative skills are elected in rich jurisdictions while politicians with high political skills are elected in poor ones. As a result, voter welfare increases only, or mainly, in rich jurisdictions. We then look for empirical support to these predictions by exploiting the decentralization reforms affecting Italian municipalities in the '90s. These reforms introduced both the direct election of the mayor and new autonomous tax tools for municipalities characterized by large differences in their tax bases. Our estimates -- robust to several alternative stories -- emphasize a differential change in elected officials at the municipal level between rich and poor jurisdictions. These findings provide a new explanation for the observed poor performance of local governments largely financed by grants.

“Finding the Warmth of other Suns? Refugee Reception, Extreme Votes and Hate Crimes”

Does refugee reception lead to more hate crimes against foreigners? What is the impact of refugee reception on extreme-right voting and which role does the media play in the transmission? Using data on Italian SPRAR refugee centres we show that the reception of refugees across Italian municipalities leads to a decrease in extreme-right voting and hate crimes against foreigners. We analyse which role media coverage can play in the transmission. Using an instrumental variables approach, we find that for the average assignment of 15 refugees per municipality the growth in vote shares for the extreme-right parties is decreased by 12.5 percentage points, which amounts to 2.25 percentage points looking at differences in vote shares. We also find that the hosting of 50 refugees leads to a reduction of about one hate crime over the period between 2013 and 2017. The effect on extreme voting is mainly driven by municipalities where local newspapers are less biased against migrants, where sport newspapers distribution is lower and where the local population has lower misperceptions of the presence of migrants.

“Do national political parties matter? Evidence from Italian municipalities”

Recently several countries have experienced a drop in popularity of national political parties, accompanied by the success of independent movements (e.g. Civic Lists in Italy). I exploit the success of Civic Lists in Italian municipalities and use them as a comparison group for party-affiliated politicians, to test whether national parties affect fiscal discipline. In particular, using a Regression Discontinuity Design (RDD), I show that party-affiliated mayors are more fiscally responsible: they run lower deficits, accumulate less debt and reduce expenditures. The effect is significant only for municipalities not constrained by fiscal rules. This suggests that

national parties act as a substitute for fiscal rules in constraining politicians. Besides that, I provide evidence that the discipline of party-affiliated politicians is linked to better career prospects: party-affiliated mayors have a higher probability of being re-elected and better chances of being promoted to higher levels of government. Finally, the results are not driven by political orientation, alignment with the central government, the presence of criminal organizations nor by unobserved political ability.
